Education

Pimpri Chinchwad College of Engineering (PCCOE)

Bachelor of Technology in Information Technology; SGPA: 8.1/10

2023 – 2027 (Expected)

Pune, India

Experience

Software Development Engineer Intern

ConnectWise

Jun 2026 – Aug 2026

Pune, India

- Developed and shipped production **billing and product-entitlement workflows** for cybersecurity integrations using **Go, REST APIs, AWS, Kafka, Docker, Valkey**, and legacy **Classic ASP**.
- Delivered **5+ reviewed and merged code changes** across backend services and internal web applications, working through code review, QA validation, CI/CD, and production rollout.
- Simplified partner onboarding by automating vendor-account discovery and expanded automated billing coverage with new product tiers and multi-product entitlement rules.
- Built **Python end-to-end QA automation** for mapping creation, usage validation, result export, and cleanup; validated billing configuration across **10+ regional vendor consoles**.
- Collaborated with product, platform, and external-vendor teams on a new billing integration while maintaining compatibility with existing production systems.

Projects

ManhwaVerse Aggregation Platform

Svelte, Spring Boot, Python, AWS, MongoDB

- Built an asynchronous ingestion pipeline using **Python asyncio + multiprocessing**, sustaining **1,000+ images/min** in local/load testing.
- Developed a **Spring Boot REST API** for metadata indexing and reading progress; integrated **AWS S3 + CloudFront** for media storage and delivery.

KinderConnect SaaS

Svelte, Node.js, Redis, Docker

- Architected a multi-tenant platform for **500+ students** with role-based access control and backend APIs for core school workflows.
- Added **Redis caching** for high-read endpoints, reducing average response latency by approximately **40%** in testing; containerized services with Docker.

FocusMate System Blocker

Electron, Svelte, C++, SQLite

- Built a cross-platform desktop productivity app with website/application blocking, focus-session controls, and offline-first analytics.
- Implemented local persistence with **SQLite** and low-latency desktop integration using Electron and C++ components.

IUGR Fetal Health Detection System

Python, Scikit-Learn, Pandas

- Developed a fetal-health classification pipeline from cardiotocography data, including feature preprocessing and Random Forest modeling.
- Achieved **92% classification accuracy** on the evaluated dataset for identifying pathological outcomes.

Technical Skills

Languages: Go (Golang), Java, Python, C++, JavaScript, TypeScript, SQL, Shell

Backend / Frameworks: Spring Boot, REST APIs, Node.js, Express.js, Svelte, React.js, Electron, Classic ASP

Cloud / DevOps: AWS, Docker, Apache Kafka, Git, GitLab CI/CD, Linux

Data: MongoDB, MySQL, Redis, Valkey, SQLite

AI-assisted Engineering: Cursor Agent, structured prompting, repository context/rules, AI-assisted debugging and feature development

Achievements

- Codeforces:** Pupil; max rating **1270**; solved **135** problems.
- Smart India Hackathon:** Internal finalist for *Urjasampda*, an energy resource monitoring system.
- Open Source:** Contributor to **TinyFileManager**; contribution credited in the project's v2.6 release.
